## City of Westminster becomes a Park-Assure Customer

**Santa Barbara, California – May 6, 2008.** EZ-Assure, an innovator and leading provider of Web-based complete security solutions, announced today that the City of Westminster in the United Kingdom is now a Park-Assure customer.

“Our Park-Assure product provides the City of Westminster the ability to monitor remotely and control access to cash in the City’s single space parking meters,” says Euan Slidders, President of EZ-Assure. “Park-Assure combines the power of the web with state-of-the-art electronic locks and keys to relieve the City of Westminster of the burden of trying to manage thousands of keys while providing them the information needed to manage effectively and protect an important source of revenue.”

“There has been a significant increase in revenue” says Alec Mather, Technical Officer for Westminster. “Park-Assure is a proven and worthwhile investment”.

### **About EZ-Assure**

EZ-Assure is an innovator and leading provider of Web-based complete security solutions. Key products include Park-Assure, Access-Assure, which provides electronic access control without wiring, and Guard-Assure which automatically verifies that guards check what they should. EZ-Assure solutions are installed among customers in the United States, Europe and Asia. For more information, visit [www.ez-assure.com](http://www.ez-assure.com).
