EZ-Assure Launches New Guard Tour Solution

Santa Barbara, California – May 9, 2008. EZ-Assure, an innovator and leading provider of Web-based complete security solutions, announced today the launch of Guard Tour in a Box, a new solution for smaller scale Guard Tour management.

“Our Guard-Assure solution, which is a fully hosted solution, has been helping many larger scale enterprises manage and audit the activity of their security guards”, says Euan Slidders, President of EZ Assure. “We saw the need to provide a similar, fully hosted service to smaller enterprises that would be simple to use and cost effective, and the result is Guard Tour in a Box. This innovative product is hardware independent and works with multiple data collection equipment offering the customer the option to use i-Button, RFID, or barcode.”

About EZ-Assure

EZ-Assure is an innovator and leading provider of Web-based complete security solutions. Key products include Guard Tour in Box, Guard-Assure, Park-Assure, which provides electronic access control for parking equipment without the need for on-site power and Access-Assure, which provides electronic access control without wiring.
