

PRESS RELEASE

Sentry Control Systems adds EZ-Assure to Product Line

Santa Barbara, California – September 5, 2008. EZ-Assure, an innovator and leading provider of Web-based complete security solutions, announced today that Sentry Control Systems has added EZ-Assure products to their product line.

"Sentry Control Systems is a premier provider of parking and access control solutions, so we are pleased that they now offer our products," said Brent Van Loggenberg, VP sales and Channel Development.

"We added EZ-Assure products to our product line because we have built our business and reputation since 1979 on identifying and effectively implementing the best solutions to our customers' problems, and EZ-Assure products are best-of-breed solutions," says Tim Flanagan, President of Sentry Control Systems. "Their Park-Assure solution, which combines the power of the web with state-of-the-art electronic locks, provides customers easy-to-use and comprehensive online management of their on-street parking operation and a compelling return on investment from reduced shrinkage."

About EZ-Assure

EZ-Assure is an innovator and leading provider of Web-based complete security solutions. Key products include Park-Assure; Access-Assure, which provides electronic access control without wiring; and Guard-Assure which automatically verifies that security guards check what they should. EZ-Assure solutions are installed among customers in the United States, the United Kingdom, Europe and Asia. For more information, visit www.ez-assure.com.
